

## Who We Are

Claritas Rx is a digital health venture focused on patient-level data integration and analytics. We leverage a proprietary cloud-based platform and deep manufacturer expertise to generate valuable insights from specialty channels and other market data. Our product platform and support services yield clear insights into commercial strategies and opportunities benefiting manufacturers, distribution partners and patients.

Competitive earning potential and the opportunity to have a significant impact on a first-in-industry digital health solution makes Claritas Rx a terrific place to work. In addition to our great environment, we offer a competitive compensation package and comprehensive benefits.

## The Position

This is an opportunity to perform and grow the Product Manager role for our patient access and collaboration product serving the specialty and orphan therapies market. You will collaborate with internal stakeholders and clients to create and evaluate product concepts, plan roadmaps, generate product requirements, and steward them through the commercialization process to successfully deliver them to market.

You will be a part of a growing company and work on pioneering products that help our customers help patients get access to specialty therapies. The ideal candidate has product management experience in the healthcare data informatics industry and a passion for products that make a difference in patients' lives.

## Responsibilities:

- Oversee the commercialization process (ideas to features to releases) to bring product to market with appropriate readiness levels to sell, deliver and support effectively
- Define and organize features and requirements in our product management software and coordinate the interface between product management and development tools
- Provide business development and sales support such as sales training, product demonstrations, and collateral development
- Create business cases including financial models to support decisions on development and prioritization of product features or services
- Participate in the research and evaluation of Buy/Build/Partner decisions on bringing solutions to market

- Conduct ongoing customer, product and market research and maintain competitor and market profiles. This can include web research, attending conferences, meetings with customers, prospects and key internal resources
- Work to construct technology and services partnerships and contracts and maintain existing partnerships that support our product offering

## Who You Are

### Requirements:

- Undergraduate degree
- 3 or more years of product management experience in the healthcare data informatics industry
- Knowledge of pharmaceutical life sciences data and operations is highly desired
- Experience defining/prioritizing detailed product requirements
- Experience with Aha and/or JIRA software tools a plus.
- Ability to communicate the vision, objectives and expectations of product releases then execute ruthlessly, e.g., roll up your sleeves to get things done
- Ability to facilitate cross-functional teams, schedules and decisions
- Ability to proactively monitor, analyze and resolve release dependencies, issues and risks
- Proficiency with Microsoft Word, Excel, PowerPoint
- Strong written and verbal communication skills
- Deadline-oriented
- Ability to travel required: approximately 10-20%

## Join Us

We are seeking to add new expertise and perspective to our strong team of experienced professionals. We aspire to a culture of accelerated professional development through: shared learning and collaboration; a respectful and fun work environment; and employee empowerment through the effective use of technology and tools.

In addition to our great environment, we offer a competitive salary and benefits package and the opportunity to make a significant impact on a first-in-industry digital health solution. Please send a cover letter along with your resume when applying to the position of interest. We are an Equal Opportunity Employer.
