

Who We Are

Claritas Rx is a digital health venture focused on patient-level data integration and analytics. We leverage a proprietary cloud-based platform and deep manufacturer expertise to generate valuable insights from specialty channels and other market data. Our product platform and support services yield clear insights into commercial strategies and opportunities benefiting manufacturers, distribution partners and patients.

We are seeking a Tableau Reporting Analyst to join our product team. The ideal candidate will have the opportunity to create interactive/dynamic content for our analytic product suite as well as ad hoc analyses for internal and external stakeholders. This position requires an organized, “self-starter” individual with a love for data analysis, data integrity and visualization.

The Position

Claritas Rx has a nimble Silicon Valley start-up culture. We are looking to build a strong customer team of domain experts that can help scale a premier channel management solution. This position will support development of algorithms enhancing business insight in specialty biotech across a range of issues, including the performance of sales teams, distribution channels and patient support services.

Key Accountabilities

- Design cutting-edge analytical prototypes for the Claritas platform
- Leverage python libraries to build solutions that perform reliably with large data sets
- Employ statistical modeling to assess the relationship and effect size of relevant variables
- Collaborate with the Claritas Product and Customer Solutions teams to build generic solution modules that can be configured to support specific customer use cases
- Collaborate with the Claritas Engineering team to automate prototypes in the Claritas software stack, and make outputs available in our reporting data store
- Support maintenance of the analytical library developed as part of these activities

Skills and Qualifications

Required

- Proficiency with python analytical libraries, particularly PANDAS and NUMPY
- A creative approach to analytical problem solving and a relentless passion for quality
- Excellent written and oral communication

Preferred

- Sufficient proficiency with SQL to build input queries driving algorithms and connect these queries to python analytics
- Domain expertise around distribution models for specialty medicines, patient services operations and/or commercial biotech strategy

Education/Experience

- 3-5 years experience in a role developing sophisticated analytical models
- Advanced degree in computer science, statistics and/or business analysis
- Experience in and/or knowledge of biotech/pharma/healthcare industry is a plus

Join Us

We are seeking to add new expertise and perspective to our strong team of experienced professionals. We aspire to a culture of accelerated professional development through: shared learning and collaboration; a respectful and fun work environment; and employee empowerment through the effective use of technology and tools.

In addition to our great people and environment, we offer a competitive salary and the opportunity to make a significant impact on a first-in-industry digital health solution. Please send a cover letter along with your resume when applying to the position of interest. We are an Equal Opportunity Employer.
