

Who We Are

Claritas Rx is a digital health venture focused on patient-level data integration and analytics. We leverage a proprietary cloud-based platform and deep manufacturer expertise to generate valuable insights from specialty channels and other market data. Our product platform and support services yield clear insights into commercial strategies and opportunities benefiting manufacturers, distribution partners and patients.

The Position

Claritas Rx has a nimble Silicon Valley start-up culture. We are looking to build a strong customer team of domain experts that can help scale a premier channel management solution.

We are looking for a System Administrator with DevOps experience to design, manage and support our Amazon Web Services environments. We're looking for someone who has a deep knowledge of the services AWS has to offer and can leverage them to provide a secure, HIPAA compliant, redundant and efficient operating environment that allows optimal performance for internal and external customers at all times.

Key Accountabilities

- Manage AWS environment and all internal servers
- Use EC2, RDS, VPC, Route 53, CloudTrail, CloudFormation, S3 and other AWS services to build, patch and manage our environment
- Use Chef cookbooks, recipes, knife and databags to centrally manage standardized application server builds.
- Plan, coordinate, and implement network security and firewalls
- Diagnose, troubleshoot and resolve hardware, software and network issues
- Configure standardized server software builds and set up hardware
- Perform, automate and monitor server and database backups
- Develop, plan and perform disaster recovery operations with regards to AWS infrastructure
- Monitor and address potential capacity limitations with CPU, memory, disk and/or the network
- Schedule and install patches on a quarterly basis
- Contribute to Claritas's growth in other areas, through participation and responsibility with internal company systems projects

Who You Are

Required:

- 8+ years' systems administration experience
- Expertise in managing Amazon Web based infrastructure
- Expertise in centralized management of server infrastructure (e.g. Chef, Puppet, etc.)
- Extensive experience with Linux Operating Systems
- Strong DevOps background, specifically as it pertains to automated builds
- Excellent written and oral communication

Preferred:

- Experience in a related capacity at a pharma/biotech manufacturer; a health tech start-up; or a comparable industry

- Experience with advanced PCI or HIPAA / HITECH requirements
- Practical knowledge of software development lifecycles and Agile methodologies

Join Us

We are seeking to add new expertise and perspective to our strong team of experienced professionals. We aspire to a culture of accelerated professional development through: shared learning and collaboration; a respectful and fun work environment; and employee empowerment through the effective use of technology and tools.

In addition to our great environment, we offer a competitive salary and benefits package and the opportunity to make a significant impact on a first-in-industry digital health solution. Please send a cover letter along with your resume when applying to the position of interest. We are an Equal Opportunity Employer.
