

## Who We Are

Claritas Rx is a digital health venture focused on patient-level data integration and analytics. We leverage a proprietary cloud-based platform and deep manufacturer expertise to generate valuable insights from specialty channels and other market data. Our product platform and support services yield clear insights into commercial strategies and opportunities benefiting manufacturers, distribution partners and patients.

We are seeking a Tableau Reporting Analyst to join our product team. The ideal candidate will have the opportunity to create interactive/dynamic content for our analytic product suite as well as ad hoc analyses for internal and external stakeholders. This position requires an organized, “self-starter” individual with a love for data analysis, data integrity and visualization.

## The Position

- Collaborates with end users to understand reporting requirements and uses business intelligence and visualization tools (currently Tableau) to create simple to complex analytic content (e.g., KPIs, reports, dashboards, scorecards, visualizations, and other analytics)
- Understands underlying data and assesses its quality and usability for any particular analysis
- Creates efficient and high-quality analytic templates and components that can be deployed across multiple environments
- Assesses data integrity on reports and within analytical products produced, and works with appropriate departments for problem resolution
- Optimizes the user experience
- Manages content and functioning across all deployments

## Skills and Qualifications

- Strong comprehension and ability to create data connections, Tableau data sources and schemas in Tableau v 10+
- Ability to design and develop reports and dashboards using Tableau Desktop and web edit including incorporation of parameters, LOD calculations, worksheet and dashboard actions and other advanced features
- Strong problem solving and logical thinking skills
- Data and database management skills with various tools such as txt editors, Microsoft Excel, and mySQL toolbox. SQL query writing a plus
- Ability to demonstrate and explain reports and dashboards to internal business teams.
- Excellent project management skills, with ability to manage detail work and communicate project status effectively to all levels
- Ability to efficiently create, update and maintain any necessary requirements, technical and training documentation
- Demonstrated ability to function in a fast paced, innovative organization

## Education/Experience

- 3+ years in related job function. Product development experience preferred
- 3+ years designing and developing dashboards using Tableau Desktop
- Bachelor's degree or equivalent combination of education/experience in a reporting analyst role
- Experience in and/or knowledge of biotech/pharma/healthcare industry is a plus

## Join Us

We are seeking to add new expertise and perspective to our strong team of experienced professionals. We aspire to a culture of accelerated professional development through: shared learning and collaboration; a respectful and fun work environment; and employee empowerment through the effective use of technology and tools.

In addition to our great people and environment, we offer a competitive salary and benefits package and the opportunity to make a significant impact on a first-in-industry digital health solution. Please send a cover letter along with your resume when applying to the position of interest. We are an Equal Opportunity Employer.
