

## About Claritas Rx (Short)

Based in South San Francisco, CA, Claritas Rx helps rare disease and specialty brands remove the barriers that keep patients from accessing and staying on the treatments they need. By uniting the most complete view of the patient journey with purpose-built technologies, we predict and resolve access challenges before they disrupt care. Our intelligent solutions combine advanced analytics, real-world data, AI, and in-line CRM capabilities to increase start and refill rates, reduce abandonment, and improve brand performance. For more information, visit [www.ClaritasRx.com](http://www.ClaritasRx.com).

## About Claritas Rx (Long)

Based in South San Francisco, CA, Claritas Rx helps rare disease and specialty brands remove the barriers that keep patients from accessing and staying on the treatments they need. By uniting the most complete view of the patient journey with purpose-built technologies, we predict and resolve access challenges before they disrupt care. Our intelligent solutions combine advanced analytics, real-world data, AI, and in-line CRM capabilities to increase start and refill rates, reduce abandonment, and improve brand performance.

As the patient journey experts, Claritas Rx works behind the scenes to transform fragmented data into cohesive intelligence that recognizes every patient journey is as unique as the patient themselves. Our intelligent suite of solutions provides real-time visibility across the entire patient journey. We see what others miss, identifying the exact points where access and adherence break down, while coordinating communications so that care teams can proactively intervene to keep treatments on track.

With a mission to ensure patients with chronic, life-threatening diseases receive the support needed to gain the greatest benefit from their therapy, Claritas Rx delivers an integrated suite of offerings—including Foundational Data Aggregation, Access Analytics, Patient Watchtower™, Patient Services Omnichannel CRM, and Performance Benchmarking. Through compliant, high-accuracy data matching, predictive risk modeling, and omnichannel care

coordination, Claritas Rx helps biopharma companies intervene earlier, keep more patients on therapy, and understand the true value of their market access programs. For more information, visit [www.ClaritasRx.com](http://www.ClaritasRx.com).
