# Foundational Data Aggregation

The foundation for clarity in patient data

See more of the patient journey with Claritas Rx.

Foundational Data Aggregation simplifies the complex process of gathering, validating, and organizing chaotic specialty pharmaceutical data from diverse sources—and transforms them into the most complete view of the patient journey available today. By giving teams a more comprehensive, timely, and accurate data foundation to work from, Market Access teams benefit from greater accuracy in their analytics, higher confidence in their insights, and sharper focus for their strategies.

Claritas Rx aggregates and harmonizes data from Specialty Pharmacies, Patient Services Hubs, co-pay program providers, and data warehouse aggregators. We collect, validate, and curate large volumes of fragmented data into clean, de-identified, and longitudinally matched records.

Aggregate and harmonize data from Specialty Pharmacies, Patient Services Hubs, co-pay program providers, and data warehouse aggregators into one unified source of truth.

Transform fragmented data into clean, validated, and de-identified longitudinal records that deliver clarity and consistency across the patient journey.

Equip your market access team with dependable, compliant data to guide confident decisions, adhering to HIPAA, HITECH, GDPR, and SOC2 standards.

With precision validation and continuous oversight, we enhance data accuracy by 66%, giving you the confidence to act on insights you can trust. Partner with Claritas Rx to gain unparalleled visibility into your patients' treatment journeys.
